

# Penta cPCx™

# IP Based Digital Communications System

## Overview:

The Penta cPCx Communications Control System is an open architecture IP based digital communications system built around the standard Compact PCI platform, H.110 digital bus architecture, and IP telephony. It will provide a system wide voice and data dispatching solution that will enable voice connectivity and interoperability between the system resources and endpoints.

- ◆ Radio/Telephone Dispatching and Interoperability
- ◆ VOIP, SIP, Digital, and Analog Circuit interfaces
- ◆ Client/Server IP-Based Architecture
- ◆ State of the Art in Technology
- ◆ Remote Access, Remote Monitoring, Remote Supervision

- ◆ Radio
- ◆ Telephone
- ◆ Intercom
- ◆ Ringdown
- ◆ PBX
- ◆ VOIP
- ◆ SIP
- ◆ Digital
- ◆ Analog
