

WavWriter is Penta Corporation's premier control suite that provides for the accurate creation, efficient distribution, and effective control of ADA compliant voice and visual messaging over modern data networks for the world's great transportation systems.

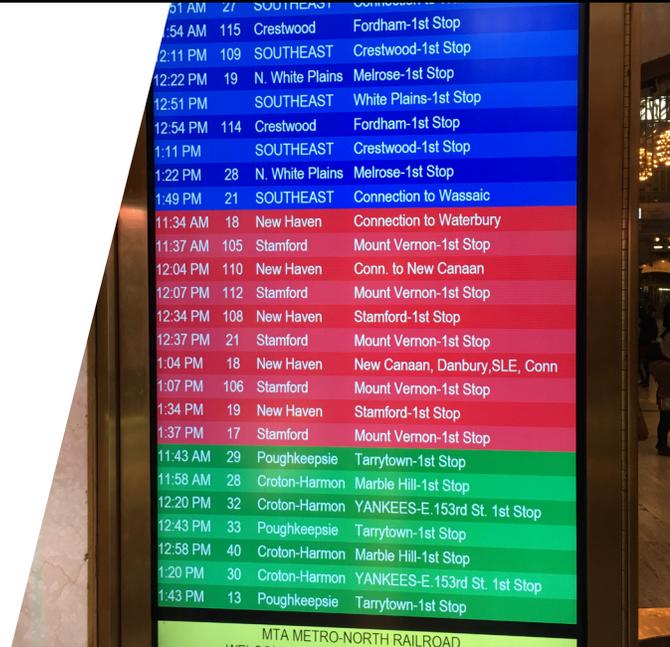

Public Address and Visual Messaging

LEADER

IN VOICE AND VISUAL SYSTEMS

Penta's WavWriter has a proven track record for keeping passengers informed and on course while using the subways, commuter rails, light rails, buses, and trolley. By delivering accurate information to visual displays and public address systems through IP communications, Penta can easily meet the needs of your transit authority.

The WavWriter system uses an intuitive map-based user interface that allows for the delivery of live, Ad Hoc, pre-recorded, automated and text-to-speech audio and visual messages that can be delivered to any station or zone.

FEATURES

ADA Compliant

Customize page displays using color, logos and graphics consistent with station branding

Live announcements, pre-recorded messages and text-to-speech

Multilingual

Supports arrival, departure, customer service and emergency messaging
